

FLORIBUNDA ROSE PLANT NAMED 'MEIWHIFLO'

Abstract of the Disclosure

A new and distinct variety of rose plant of the Floribunda Class is provided which abundantly forms attractive very double starkly brilliant white blossoms that well retain their coloration upon maturity. The growth habit is upright bushy. Very dense dark green semi-glossy foliage is formed that contrasts nicely with the blossom coloration. The plant develops well following budding and grafting. Good disease resistance is displayed. The new variety is well suited for forming attractive ornamentation in the garden or for cut flower production.
